STAT

MEMORANDUM FOR:

Executive Secretary, Personal Security Committee  
Interagency Group/Countermeasures (Policy)

25X1

FROM:

Community Counterintelligence and Security  
Countermeasures Office, IC Staff

25X1

SUBJECT:

Project Slammer - Congressional Inquiry

STAT

1. On this date, Project Slammer Director, Lt Col Neil Hibler, called on several issues. The one pertinent to this memorandum concerns a recent notification he received from Air Force liaison. He was informed that representatives of the House Permanent Select Committee on Intelligence (HPSCI) have requested a briefing on Project Slammer, which they knew to be under the cognizance of Hibler. Neil responded to the Air Force authorities by saying he would have to get the approval of the project sponsors. The HPSCI staff officers who wished to be briefed were identified as Al Toon, Bernie Raimo, and Steve Nelson. I told Hibler that we in CCISCMO could offer no objection to the request but deferred to OS/CIA and the Chairman of the Personnel Security Committee since that body was now the official sponsor of the project.

STAT

2. Hibler will be out of town for the next two weeks, and he was certain that no urgency was associated with the request. He has informed the Air Force liaison office that sometime after the first week in April he might have an answer and approval to brief the HPSCI personnel.

STAT

3. This appears to be a legitimate request and CCISCMO recommends approval for conduct of the briefing. It is also recommended that Office of Congressional Affairs be apprised and consulted for their guidance. Legislative Liaison Staff/ICS is being informed by copy of this memorandum.
